### Bexar County 2003 Behavioral Risk Factor Surveillance by Race and Ethnicity

### Texas 2003 Behavioral Risk Factor Surveillance by Race and Ethnicity

Note: 2003 Behavioral Risk Factor Surveillance Survey (BRFSS) included 329 randomly selected Bexar county residents.

Note: There were insufficient responses from the Black population in Bexar County to reliably estimate risk factors for 2003.

Note: Acute alcohol risk = 5 or more drinks on an occasion in the past 30 days.

Note: Heavy alcohol risk = > 2 drinks per day men, > 1 drink per day women - during the past 30 days.

Note: All reported rates (%) are weighted for Texas demographics and the probability of selection and

thus are not derived from the simple division of numerator and denominator cases.
